Phoenix Men May Buy Idle Mine and Believe They Have a "Sleeper."

days W. B. Twitchell and Joseph Cope. of Phoenix, will commence operations at the old filmeen mine, five miles from Congress Junction, near the Congress, the Octave and the famous Rich Hill

the Octave and the famous Rien Hill pincer digglings.

Twitchell and Cope recently acquired the Rincon from Mrs. Daisy E. Thomas, whose deceased ausband purchased the property at a tax sale in 1916. They believe that they have secured a "aleeper," which can be developed into a big gold producer at comparatively little expense. Mismanagement is the only reason, declares Twitchell, that the Rincon does not rank today with the Tom Reed, Gold Road, Vulture and other famous Arlsona gold mines.

Add Five Locations to Group.

Arisona gold mines

Add Five Locations to Group.

The Rincon was discovered in the early 80's and the first company that took hold of it patented is claims. Twittenell and Cope have made five adjoining locations so the group includes Is claims at this time.

A 28-degree incline shaft is down tess feet, with drifts and raises every 50 feet. A tunnel is in 200 feet and ultimately will cut the ore holy about 200 feet under the bottom of the shaft. Extending this adit tunnel will be the first work undertaken by the new

wide.

All the Rincon ore is ideal for oil flotation. By means of flotation 95 per cent of the gold value can be saved, but under the old methods the best recovery that could be made was 65 per cent. Tests have proved conclusive that the milling ore will average better than \$20 a ton, and the massive sulphides run above \$180. All the values are gold.

In Well Equipped.

The Ithmon is equipped with a complete mill, a ten-machine compressor, one 150-horsepower gasoline engine, two 46-horsepower gasoline engine, two 46-horsepower gas engines, large and small hoist, cable, ore cars, track, tracks and about everything else that is needed to begin operations on a hig scale. There are several buildings, including bunk houses, cook house, dising room, manager's house, stable and two blacksmith shops.

ERNESTINE MINE INSTALS NEW PUMP

Silver City, N. M., Dec. S .- A new machine shop and cestrifugal pump-have been installed by the Ernestine Mining company at Mogollon. The Pacific mine is sanding 100 tons of ore laily to the custom mill of the Socorro

IRON CAP MAKES | UATMAN BUUM \$85,247 PROFIT

Miami Mines Are Yielding Much Copper Ore at Good Profit, Figures Show.

Miami, Ariz., Dec. 8.-Figures show that the copper mines of the Miami district are producing ore and marketing trict are producing ore and marketing it at good prices. A case in point is the Iron Cap which paid a net profit of \$5.3.74 in October. After a seren per cent dividend had been paid on the preferred stock, the common stock was paid at the rate of 73 cents per share. This profit covered the six months operations preceding October 21. In the month of October alone, the Iron Cap produced 173,547 pounds of copper at an average price of 9.3 cents per pound. The net profit for the month was \$15,085.

"Mine" Ore From Surface.

A freekish feature of mining is now

"Mine" Ore From Surface.

A freakish feature of mining is now being demonstrated by the Inspiration Copper company which is mining from underground a lot of ore which had already been brought out and dumped on the surface.

The caving between the Joe Bush and Captain shafts has caused a heavy eag in the ground beneath the Joe Bush dump which is said to contain 150,000 tons of good ore. Branching raises have been driven in the ground heneath the dump and the ore is to be drawn down to the tramming level for transportation to the main shafts. A smaller dump at the collar of the Colorado shaft is to be recovered in the same way.

The Inspiration company has te-

The inspiration company has re-sived its third oil burning locomotive it is 25 tons heavier than either of the

Smith Pleased With Old Commercial. Smith Picased With Old Commercial.
While at Globe, president Charles S.
Smith of the Old Dominion and Arisona
Commercial Copper companies, expressed himself as being particularly
pleased with the condition of the
Arisona Commercial on the 14th level
where the ore has been opened a distance of 390 feet. The best ore now
being produced by the mine comes from
that level. Sulphide ores are being
stoped on the 13th and 13th levels.

May Instal Electric Plant.

stoped on the 17th and 18th levels,
May Instal Electric Plant.
President Smith said it had not been decided definitely whether an electric power plant would be installed at the Eureka shaft, but that it was probable the plan would be adopted. The Arisona Commercial new buys its power from the Old Deminion.

Woods Develops Sulphide Group.

THINK PESQUEIRA'S MINE IS RELOCATED

MINE IS RELOCATED

Thoson. Ariz. Dec. 8.—Relocation notices for a group of claims believed to have been worked 60 years ago by Gen. Ygnacio Pesqueira, have been filed here by C. E. Patterson. Hundreds of prospectors have searched the crivaca region for Pesqueira's mine, but without success. Patterson noticed something that had been overlooked by all the others. He saw that along a long straight line the trees and bushes were much larger and sturdler than they were on the surrounding mess. It looked to him as though the earth had been disturbed, making it more pervious to water, so he began to dig.

Now Patterson has a trench 500 feet long and 20 feet deep, exposing a five-foot cein of sulphids ore in the bottom. In the process he semoted many rotted timbers. He believes that Pesqueira filled in the trench and abandoned the property after taking out the free-milling ores bear the surface.

Pesqueiro was in political and financial straits when he came up into Arizons, with some 500 men, and began mining. He took out enough gold to rehabilitate his fortunes and finance a war which resulted in the conquest of Sonora.

Well Financed New Companies Are Entering the Mohave County Field.

Kingman, Ariz., Dec. 8.-Indications are that the year of 1916 will witness in the mining town of Ontman, in the San Francisco mining district, 26 miles southwest of Kineman, a marked increase in operations. New companies organized during the last 60 days are

crease in operations. New companies organized during the last 80 days are getting financed in excellent fashion and plan to inagerate work upon an extensive scale within the next 20 days. The result being obtained by the active companies in the various sections of the camp and Molave county continue to attract the attention of mining men and capitalists and, in consequence, the stampeds is dults growing in volume; indeed, it would seem that the mining boom is just now gelting well under way.

In Oalman and the various other camps reached from Kingman and in Kingman inself accommodations for the fortune seckers are at a premium, as a result of which there is great building activity.

The United Eastern management is proceeding with new development work incident to the plan of operating its famous property upon a giganite scale. The new vertical three-compariment shaft has attained a depth of 56 feet on its way to the 500-foot point and a grawity feed bin, capable of holding 200 tons of ore, is being erected above the collar. When the shaft is completed it will be used in hoisting the output of the immense bodies of ore that have been opened up by drifts and crosscuts tributary to the present 562-foot working shaft. For the present work on the 10s foot level of the old shaft has been stopped and the machine drills that have been doing service at that depth have been put in use on deeper levels.

Big Jim Again Prominent.

The Big Jim has again come into prominence through a 71nd that gives

Big Jim Again Prominent.

The Big Jim has again come into preminence through a find that gives promise of becoming a very important development with further work. The shaft on the property recently reached the 409-foot point, and general superimismient Keating decided that he would put in one round of shots toward starting a station at that depth before providing a 25-foot sump and proceeding with lateral work. After the round had been set off, it was found to have broken about two feet of wall rock and 15 inches of the main vein generally considered the extension of the Tom Reed-United Eastern ledge. According to an official amouncement, the portion of the vein disclosed gave an assay return of \$2.51, which, while small, is encouraging. The management is at present sinking the sump, upon the completion of which the exploration of the find will be inaugur-

ated.
It is stated by manager Gray that P. Dabney, a well known capitalist of Los Angeles. Bas become indentified with the Times Mining company, through the purchase for \$250,000 of an equal number of shares or half of a 500,000 share increase in the capitalistical of the company from 1,000,000 in 1,500,000 shares of the par value of 25 cents each.

Gilt Edge to Start Sinking.

Patterson noticed something that had been overlooked by all the others. He saw that along a long straight line the trees and bushes were much larger and sturdler than they were on the surrounding mean. It looked to him as though the earth and been disturbed, making it more pervious to water, not be began to dig.

Now Patterson has a trench 500 feet as the objective point. To facilitate this work the company will receive and pince in commission willing over the next three weeks a 23-horsepower gasoline hoist and six-drill air company at the spiendid showing that has been dereloped by the Tyro Gold Mines company at its property is steadily income and straits when he came up into Arizons, with some \$80 men, and began mining. Jackling Gets Orphas Mine.

Col. D. C. Jackling, heavy stock-holder in the United Eastern mine at Oatman, and one of the wealthiest mining operators in the world, it is reported has acquired the lease and bond of O. T. James upon the Orphan mine of "Shorty" Werner at Secret Pass, one of the camps of the San Francisco district, 10 miles weat of Kingman. Although no official information, it is said that James is to receive a good-sized fortune above the price fixed in his lease and bond from the owner. Since taking hold of the property about twe and a half months ago James has shipped five bricks of buillon, aggregating 102 ounces and valued at approximately \$15 per ounce.

Cedar Valley District, situated to the contract of Kingman.

SMELTERS PRODUCE

BIG COPPER TONNAGE Douglas, Ariz., Dec. 8.—Both the Copper Queen and the Calumet and Arizona smelters here have shown large tunnages of copper orofluced in November. The Copper Queen's production was 11,500,000 pounds, approximately. The yield of the Calumet and Arizona smelter is estimated at about 1,500,000 pounds. The production of the Copper Queen was a little under that of October, because of the falling off in receipts of Moctesuma Copper company's concentrates which followed military operations in the Nacozari district.

Plapao Co., Block 1741 GOOD FOR YOUNG LAND OLD

ENGLISH INVESTORS PLAN TO MINE IN COCHISE COUNTY TAKE OVER MT. UNION MINE

Tombstone, Ariz, Dec. 8.—Oscar Evans has taken a bond upon the "Old Friend" group of copper claims 12 miles northeast of Tombstone, and a force of men has been put to worlt constructing a road to the property. The owners from whom the bond was secured are James and Charles Hamilton and Abe Perkins of Bisbee. The consideration is given as \$120,000. Evans has secured Henry Roberts as mine manager and Ed. Riley as foreman. A concentrator and holst will be installed and development work pushed it is announced. A narrow sage railroad is being surveyed to the group from Cochine Stronghold, a distance of 15 miles.

TAKE OVER MT. UNION MINE

Prescott. Ariz., Dec. 8.—English investors who recently arrived in New York are to be in Prescott within two weeks to take over the Mount Union mine, owned by the Mount Union Consolidated Mining company. The principal stockholders reside in the eastern states.

The Mount Union mine is on the slope of Mount Union, the highest peak in the Hassayampa mountains.

J. R. Boyer has transferred his group of mines in the Cherry Creek district to the Rig Ledge Development company, which has already let a contract for 50¢ feet of and and drift work.

Molybdenite has been discovered on the claims of John Brady and J. E. Pitzgerald, three miles south of Prescrett. The discovery was made at a depth of 30 feet and it is stated that the ore carries hot only molybdenum, but several other rare metals that are now in great demand. miles.

Much other ground in the vicinity of the "Old Friend" group has been filed pon. Some of it contains showings of

UNITED VERDE EXTENSION HAS \$200,000 IN TREASURY

HAS \$200,000 IN TREASURY

Jerome, Ariz., Dec. 8.—The United Verde Extension Mining company has over \$200,000 in its treasury, all accumulated from ore sales. This is more than three-fourths of the entire amount invested in the property.

Ore is now being shipped to the Clarkdale smelter at the rate of 40 tons a day. Ten tons of this runs above 45 per cent in copper, and the remainder would be called "high grade" in Rinbee, Clifton or Globe.

A new hoist for the handlink of ore from the sleventh, twelfth and four-teenth levels, will be in operation this week. Eighty men are employed.

It is now expected that the aerial transway to the railroad, a mile distant, will be completed by the first of the year.

Vinol is a delicious cod liver and from tonic without oil a constitutional ramedy which creates an appetite, aids digestion and makes pure healthy blood. Try it on our guarantee. Kelly & Pollard, draggists—Adv.

If little stomach is sour, liver torpid or bowels clogged.

Acute Articular Rheumatism

The exact cause of rheumatism is unknown, though it is generally believed to be due to an excess of urice and in the blood. It may be also said with equal truth that no remedy has been found which is a specific it all cases. In fact the literature of rheumatism shows that there are but few drags which have not been given a trial. In the hands of one observer we find that a certain drug has been used with the timost satisfaction; others have found the same remedy to be a great disappointment. All physicians however agree that every method of treatment is aided by the administration of some remedy to relieve the pain and quiet be nervous system and Dr. W. S. Schultse expresses the opinion of thousands of practitioners when he says that Anti-Kamaia Tablets should be given preference over all other remedies for the relief of the pain in all forms of rheumatism. These tablets can be purchased in any quantity. They are also unsurpassed in hearfaches, neuralgian and all pain. Ask for A-K Tablets.
